Dear [REDACTED],

Environmental Information Regulations 2004

I refer to your *request for information received by the Department on 25 May 2021* that sought the following information:

1. How many incidents of agricultural pollution have been recorded in Northern Ireland rivers from 1st of January 2017 to the 30th of April 2021? (please include impact i.e. high, low)
 - a. Of those incidents how many resulted in a prosecution
 - b. Of those incidents how many resulted in a penalty / fine
 - c. Of those incidents how were they dealt with? (warning letters etc.)

I can advise that the Department has completed its search and can confirm that it holds the information you requested which is attached as a spreadsheet as requested and summarised below:

During the date range specified in the query there were:

- 1023 Low Severity Incidents (605 where the polluter was identified and 418 where there was no polluter identified);
- 247 Medium Severity Incidents (189 where the polluter was identified and 58 where there was no polluter identified); and

Sustainability at the heart of a living, working, active landscape valued by everyone.

If you are deaf or have a hearing difficulty you can contact the Department via the Next Generation Text Relay Service by dialling 18001 + telephone number.

- 39 High Severity Incidents (20 where the polluter was identified and 19 where there was no polluter identified).

It should be noted that no formal enforcement action is generally taken for low severity incidents. However should the pollution not be addressed or it reoccurs then the Department will take further action including formal enforcement if required. For high and medium severity incidents the outcomes were as follows:
