5th November 2018

A Chara,

I am writing in reference to the Construction Environmental Management Plan submitted on the 1st of October 2018, and the letter received on the 1st November 2018, with respect to compliance with Condition 6 of Planning Permission Appeal Reference PL27.247745 (PRR 16/363). The Planning Authority considers that the Construction Environmental Management Plan accords with the provisions of Condition 6 subject to the following clarifications:

- i. The confirmation set out in the letter received on the 1st of November 2018 shall apply.
- ii. Any pollution incidents, breaches of environmental procedures of accidental releases shall be reported to the Planning Authority immediately.
- iii. Dust, Noise and Vibration monitoring records shall be maintained on site and shall be made available to the Planning Authority as and when requested.
- iv. The Waste Management Section indicates that to accord with the normal waste management system, details of the specific waste collectors and waste facilities that the various waste streams will be removed to before the wastes leave the site should be confirmed to the Planning Authority. With regards to excavated soil, all surplus soils to be treated as a waste and must be removed to appropriate sites with either a waste license or waste facility permit. Please note that the Waste Management Section will liaise directly with you in respect of these matters.

I hope this clarifies the matter.

Mise le Meas,

Lynn Murphy
Clerical Officer
Planning, Development & Environment
