Thanks for sending that on, Eoin.

We'll review and then look to set up a date to discuss the results.

Regards,

John

Subject: Santry river assessment - Interpretive report

Morning lads,

First off I wanted to apologise for how long it has taken to get you this report.

It has been a tough 6 months for us, and my team is down to 50% capacity. Donal O Keefe put this analysis and report together. He's done a very good job, but it took a lot of work and reviews to get it to a point I was happy to send it to you. Donal only joined us last year, and this was his first time presenting this kind of work.

I am happy that the work is at a stage that you can review and look at potential actions to follow. Going forward we can put a much more defined timeline on the reporting outputs from any joint work we carry out.

If you could review the report and let me know availability to discuss the results, it would be great.

All the best,

Eoin
