thanks for that information Joan – is there a time that would suit for a call?

Hi Jim,

I hope you are all settled in at this stage.

Can you give me a call re Longford Wastewater treatment plant when you get a chance. This pressure evolved from urban wastewater /urban diffuse being the significant pressures to urban diffuse now being the significant pressure with a question mark over the loadings coming from SW002. I uploaded the attached as an update to the significant pressure report already referred to the EPA/UÉ previously.

I am not sure should I refer this to the EPA still or to Longford County Council – the good news is that it is undergoing DAP and it’s been highlighted as a pilot for integrated urban wastewater management as per the Recast Directive, so the bit of pressure applied to Uisce Éireann to get clarity on SW002 has paid off, I think as it wasn’t on any investment strategy as far as I can tell previously.

Many thanks,

Joan
