

Walkover Survey Form

BAU: 5	Property: [REDACTED]	HU: [REDACTED]
Surveyor: [REDACTED]	Survey Date: 28/07/23	Target Species:
Start & End Time: 12.30 - 15:00		
Weather Conditions: Bright, sunny, light breeze, a few brief showers		
Main Habitats Surveyed: CHF		

Species Name	Species Code	Count	Breeding Evidence	Notes / Location:
Buzzard	BZ	3	T	In property but not the survey HU
Robin	R.	3	S	
Wren	WR	5	P	
Wood Pigeon	WP	1	F	
House Martin	HM	5-10	F	
Goldcrest	GC	10+	P	
Chaffinch	CH	4	P	
Coal Tit	CT	2	S	
Siskin	SK	1	S	
Dunnock	D.	2	S	
Hooded Crow	HC	2	F	
Blackcap	BC	3	P	Heard in HU but pair observed in scrub of adjacent felled area
Jay	J.	1	S	
Chiffchaff	CC	4	S	In scrub and clearings adjacent conifer blocks
Other records of interest (plants, mammals, inverts, etc.)				
Red squirrel present.				
Summary of Main Findings: Blackcaps nesting in clearfelled area adjacent to HU. Buzzards nesting in other part of property [REDACTED]				
Recommended Next Steps: Further survey in other parts of property to locate and mark Buzzard nest / recheck prior to operations in that area.				
Survey Limitations: Good forest road network but some parts within forest not accessible due to flooding. Should develop a process for recording areas that were not fully surveyed but observations made and that need pre-operational checks when it comes to harvesting time for those areas.
